[Security Export Control]

Ibaraki University has established the internal regulations, based on the Foreign Exchange and Foreign Trade Act stipulated by the Government of Japan and the university will appropriately manage the export of goods, the transfer of technologies, the exchange of human resources, etc., particularly from the perspective of security. As a part of this effort, foreign students and researchers must submit their research contents before they are accepted as students/staff members/visitors of the university.

If the subjects are considered to be the matters regulated by laws, please ensure that you consult with the expected supervisor and provide confirmation before submitting the application form as there could be restriction or even prohibition to conduct your desired research activities or to receive education.

As a part of the admission process, we will request you to submit a pledge to comply with the Foreign Exchange and Foreign Trade Act.

The Graduate School of Science and Engineering (GSSE) of Ibaraki University was founded in 1995. The Institute of Applied Beam Science (IABS) was established as part of the GSSE in 2004 for study and utilization of a wide variety of quantum beams including, but not limited to electromagnetic radiation (X-rays,  $\gamma$ -rays, and optical laser beams) and particle beams (neutron, electron, proton) defined together as Quantum Beams. We are excited to announce that GSSE have been expanded from April 2016 with the Institute of Quantum Beam Science (IQBS) program. The re-envisioned GSSE have three institutes that are IQBS, Institute of Complex Systems Science, and Institute of Society's Infrastructure Systems Science as the result of reorganization of the six current institutes (Applied Beam Science, Material Science, Industrial Science, Information and System Sciences, Physical Sciences, Environmental and Functional Sciences).

Successful applicants for graduate school at GSSE of Ibaraki University will enjoy an engaging and enriching educational program in addition to pursuing their own, individualized research studies in working toward becoming experts of their respective fields. Graduate students are expected to have an important role at the GSSE of Ibaraki University by actively participating in research, assisting teaching and providing significant contributions to science and engineering. They will study under the supervision of respected and dedicated faculty members at the GSSE. The educational, scientific, and engineering programs will prepare the students to start their life in their intended career choice after the graduation from the GSSE of Ibaraki University.
